Large bolts of negative lightning can carry up to kA and coulombs. Once a conductive channel bridges the air gap between the negative charge excess in the cloud and the positive surface charge excess below, there is a large drop in resistance across the lightning channel. Still few flakes falling. NOAApageonhowtheU. One thing to remember when looking at old records the official Valentine weather station has moved several times. Each subsequent stroke usually re-uses the discharge channel taken by the previous one, but the

channel may be offset from its previous position as wind displaces the hot channel.

Justdroveroads,stillwarmenoughnoticedover.Iwonder.RAP short term hourly model last run has Valentine in the no doubter category with " by midnight and still more coming.
