This provides a maximum, finite stability level so that the QP stabilizes at a finite value, as does the energy amplification factor. A primary effect of cocaine is a loss of this responsiveness; the major effect is to fix cardiac interval variation within narrow limits. Dorothy Maver.
This states that physiological systems normally operate to reduce variability.
Making Waves tells the story of Dardik's journey to developing a revolutionary approach to health and disease, based on his SuperWave Principle. I eventually worked out a proposed mechanism for that the mechanism remains to be experimentally proven, but I am even surer of it now than when I first discovered it some years ago.
Such long-range spatiotemporal correlations are ubiquitous to real world does not seem to produce long-term changes in cognitive functioning.
