Azyabi [ 7 ] research has some weaknesses in the form of small sample size and generalizability; however, it is unique in the Asia-Pacific region and has further provided a source of motivation to conduct a similar study within the context of Southeast Asia. Azyabi [ 7 ] conducted a study of 34 SMEs in the Victorian State of Australia that used IT strategic development methods, perceived benefits, and encountered barriers, as pointed out in the previous section and motivated to conduct this study in Brunei, and found that only three methods are found to have indirect influence Information Technology Business: and Why they Struggle! IT strategy development: critical success factors, transaction cost, and balanced scorecard.
