Instead they ask readers to send in everything from their zodiac sign and time of birth to their marital status -- all under the guise of a research study where they could end up winning large amounts of money. On one hand, artificial intelligence AI has resulted in increased efficiency in the conduct of arbitral proceedings, but on the other, it has also given rise to AI products such as, Lex Machina and Premonition Legal Analytics which have the potential of reducing the need for lawyers in certain tasks.

We would like to express our sincere thanks and appreciation to the outgoing... We use your LinkedIn profile and activity data to personalize ads and to show you more relevant ads. Kapur, SC, argued for interim relief to be granted since there were risks involved as one of the Respondents did not own any known assets. The panellists also observed that the research conducted on witness recollection have thus far been carried out in relatively controlled scenarios, and hence might not accurately reflect or be directly applicable to international arbitration processes.
